- Advanced fabric technology to filter light and reduce glare to help protect furniture and plants.
- Easily adjustable systems that allow you to control the lighting levels and still enjoy your garden.
- SPC® high performance fabrics are available to help reduce heat gain in summer and retain warmth in winter.

# Energy Saving...

...Be cool, stay warm and save money

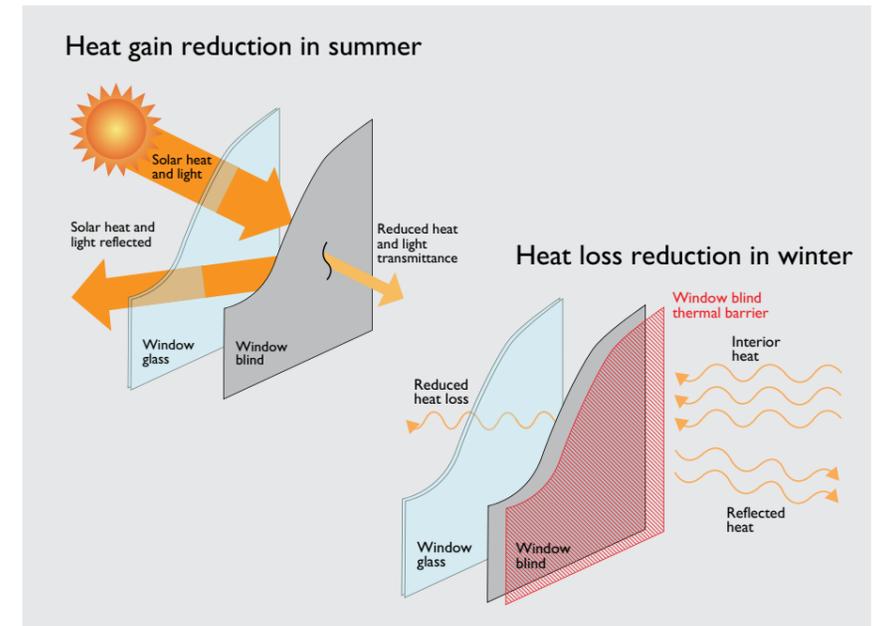

Roller blinds reduce solar gain in your home during the summer months.

Reducing heat build up provides a more acceptable room temperature and reduces air conditioning requirements, saving you money.

Roller blinds also reduce the amount of heat lost through windows when it's cold outside.

This thermal loss reduction helps the heat stay in your home when you need it and reduces your heating costs.

Window blinds help you 'Be Cool and Stay Warm' providing improved living conditions and substantial energy savings.
