

TIMBERLUX COLLECTION

Natural tone. Natural feel. Natural choice.

 TIMBERLUX™

TIMBERLUX

Enjoy the elegance and warmth of our handcrafted Basswood Collection. Timberlux™ is a luxurious collection of handcrafted, basswood venetian blinds that reflects the beauty and elegance of nature. Fashioned from full grain Basswood, each blind has its own unique character because each slat is hand-picked for perfect line and colour.

The natural quality of our carefully selected timbers means that Timberlux™ blinds will sit comfortably against all colours and designs. You can also choose from a stunning range of tapes and acorns that can be incorporated into these beautiful blinds.

Whatever your style – traditional or modern – you can colour contrast with unusual and brilliant tape colours, or blend in perfectly with the natural tone of the wood.

With a little planning your wood blind can even stand alone as an elegant piece of window furniture thus effortlessly transforming the whole character of the room. And it's not just beauty that Timberlux™ brings to your home. Timberlux™ wood blinds are also incredibly energy-efficient offering up to 1000 times better insulation than aluminium. So warmth is not just a cosy illusion – it's a feel good reality.

The Timberlux™ Basswood collection – the natural choice.

The Timberlux Collection incorporates an extensive range of wood types, ensuring all taste preferences are met;

Classic Collection

A sophisticated range of natural wood tones ranging from refreshing Pine to rich Walnut, and dramatic Wenge.

Colour Collection

A subtle colour palette completes this collection, including whites, neutral tones and soft pastels.

Natural Collection

With an emphasis on the wood grain, this collection of natural wood tones will add subtle depth to your Timberlux™ blind.

Rustic Collection

The natural knots visible in the Rustic Collection create an authentic country feel for your blind. Rustic Collection woods are available in 3 natural wood tones.

Deep Grain Collection

Each slat is individually sandblasted, creating a deep grained texture adding an extra dimension to your blind.

35mm Collection

This elegant range of 35mm woods is available in our most popular colours that complement the majority of colour schemes.

Shutter Style Collection

This luxurious wood collection has been inspired by the look of plantation shutters. The wide 65mm, curved, hole-free slat offers complete closure. The Shutter Style Collection is available in a variety of popular wood shades, ranging from clean and crisp Arctic White to popular Sugar Maple and rich Pecan.

Our Smartwood Policy

Timberlux™ Basswood is certified as coming from well-maintained forests adhering to strict environmental and Socio Economic standards set out by Forest Stewardship Council.

Initiated in 1989, Smartwood is the older and most extensive certification program in the world and is a program of the Rainforest Alliance.

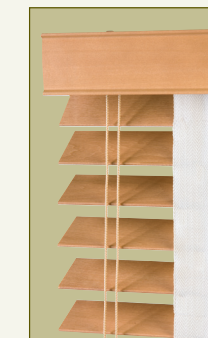

Though the program initially focused on tropical forests, today Smartwood works in all forest types, tropical, temperate and boreal – and across all operations, including natural forests, plantations, large commercial operations and small-scale community projects.

Our Timberlux™ basswood venetian blinds are available in a choice of 3 operating systems:

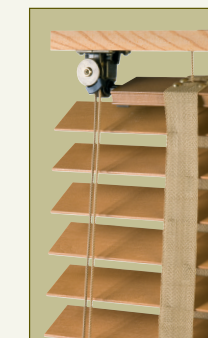

Oxford

Classic, dignified good looks. Colour co-ordinating cords, ladder strings and headrail with sculptured valance. Slat are available in dramatic 50mm and 45mm, elegant 35mm or contemporary 25mm widths.

Balmoral

Traditional style blinds with the choice of either 38mm or 25mm wide tapes for 50mm slats and 25mm tapes for 35mm slats. For 25mm slats 19mm wide tapes are available. A stylish sculptured valance adds the finishing touch.

Windsor

Elegance from a bygone age. Hand-crafted solid wood headrail and tilt bar. Bold wide tapes with 50mm wide slats. Authentic reproduction cast features. Classic craftsmanship and style.

Through certification and use of the Smartwood label, the program provides a commercial incentive for forest managers to adopt sustainable forestry practises. Smartwood certifies forest products that come from "well-managed" forests. This ensures that timber harvesting is ecologically beneficial to local communities.
