

# Skylight

Bloc Skylight blinds can enhance the performance of all forms of roof windows. Compatible with all major skylight brands, we can also work with you to engineer custom built blinds for your windows.

Installation of the blind couldn't be simpler. Our four screw system means installation is easy and mess free.

Our skylight blinds are suitable for the following roof window types:

**VELUX®**  
**DAKSTRA®**  
**FAKRO®**  
**OKPOL®**  
**ROOFLITE®**  
**ROTO®**

## Product Specification

<b>Sizes</b>	All Manufacturing Codes
<b>Suitable for</b>	Velux® Roof Windows, Dakstra®, Fakro®, Okpol®, Roof Lite®, Roto®, non standards, others

## Product Dimensions

<b>a. Cassette Height</b>	60mm
<b>b. Frame Width</b>	31mm
<b>c. Cassette Depth</b>	52mm

## Operation, Care and Maintenance

### Operation

Operation of the blind is through a spring system operated by the handle at the bottom of the blind. The blind simply pulls down through the side channels locking whenever the handle is released. The handle is then pushed in towards the window releasing the lock which enables the spring to retract the fabric. It complies fully with all relevant child safety standards.

### Care Instructions

We are all very proud of our stunning Skylight blinds. To keep them looking their best for years to come, always ensure that your Skylight blinds have been securely fitted and use a synthetic or feather duster to clean, refrain from using soap and water. Should any part of the blind fail contact our dedicated Customer Service team who will be happy to assist you.

### Maintenance

All our Skylight blind components are manufactured using aluminium and glass reinforced nylon. They do not present any corrosion problems in normal environments. The system has been designed for smooth operation, together with rigidity to prolong the window blinds working life. Manufacturing and installation guidelines for the size restrictions for each type of installation are included in this specified brochure.

Bloc Blinds incorporate a number of specially developed features that make our skylight blinds superior to others on the market. (1) Brush seals create a barrier between the blind and the window frame, blocking out light and

reducing heat loss. (2) Clips are attached to the fabric to ensure the blind stays securely within the runners at all times. (3) The fabric is completely enclosed, reducing fading and significantly extending the life of the fabric.

## Frame Colour Options

## Child Safety

Being a family run business, we know the importance of safety in a home. That's why every one of our designs is guided by our own Safe by Design principles and fully comply with the latest European directives. The Skylight blind has no cords or chains and consequently is Safe by Design.
